IMGASA NON-LETHAL SELF DEFENSE

2011

TIGERLIGHT® FLASHLIGHTS WITH MILITARY GRADE PEPPER SPRAY FOR SHORT RANGE AND 1 OR MORE ATTACKERS

TigerLight® Series II Effective to 18 Feet and T100 Effective to 14 Feet!

Catches attackers by surprise. Greater impact on breathing. The T100 fits easily in your pocket or purse. Proven effective by police. Combines blinding light with pepper spray. Easy to use for ages 18-80, male or female. Looks like a flashlight or other handheld device. Sprays twice as hard and twice the volume per sec.

Designed to spray out twice as hard, twice as fast and with twice the volume per second as the best pepper spray products on the market. Simply the best ever invented.

The spray penetrates deeper into the pores of the skin and moves faster and deeper into the mouth and nose. Because of the element of surprise and speed of delivery, this self defense product causes a greater impact on the respiratory system, creating a more forceful stopping power than normally achieved with pepper spray canisters.

Proven 96 % effective in a study by the Los Angeles County Sheriff's Department. Used by the United States Military and police all over the world. Now available for the first time in Costa Rica.

TigerLight® Series II Includes Charger and 1 Pepper Canisters [TLSERIES2]

TigerLight® T100 Includes 1 Pepper Canisters [TLT100]
